David –

In case Joe gets tied up and doesn't get this to you right away, here's the last version that I've seen of the check-sheet and supporting documents that were mentioned in today's call.

Regards,

Kurt

Hi Ben,

As follow-up to our discussions during the AE workgroup meeting in New Orleans, attached you will find a few documents that we hope will inform the GWPC AE workgroup efforts.

The draft aquifer exemption checklist

- Informed by the workgroup's discussions on AE criteria and review process
- Informed also by attachment 3 of Guidance 34
- Organized by sections: A-C focus on general information, and D-K cover demonstration to meet specific AE criteria

An excerpt from Guidance 34 of the dispute resolution process in State applications, including a highlighted section for AEs (this document quotes a February 1, 1984, memorandum from Sam Schulhof which is also attached)

- Do we need still need a separate dispute resolution process on AEs
- Does the workgroup has suggestions on how to use, modify, or amend the current process

Please let me know if you have any questions or need additional information.

Regards,

Joe.
